Secretary, Advanced Center for
Water Resources Development
& Management

Delivering Change Foundation (DCF) is an independent organization that partners with governments and communities to accomplish nation transformation. DCF is committed to delivering socio-economic change through systemized programs that are fast and result oriented on a five-year timeline, yet intense and large scale to ensure last-mile impact.

The unique promise of DCF is to align boardroom policy with grassroots action by advancing the trilogy of Emotional Connect, Intensive Planning and Absolute Execution.

EMOTIONAL CONNECT PROGRAM

Based on extensive research, DCF realized that there were five reasons for any national level problem and underdevelopment.

- **Disconnection:** Lack of knowledge in the ‘boardroom’ of the real problems at the ‘grassroots’.
- **Silos:** Different organizations see only part of the problem (like Central/Federal Government, Local Government Agencies, NGOs + Foreign Aid + CSR Programs, and Industry).
- **Detached Planning:** Working without grassroots level involvement.
- **Scattered Implementation:** No prioritization based on urgency and importance, thereby generating little change.
- **No Proper/Continuous Monitoring:** Lack of measurement of the social effects of development work.

To overcome these hurdles, DCF came up with the unique model of the Emotional Connect Program — making community networks and involving those networks in various nation transformation projects. Through this model, DCF ensures multi-stakeholder involvement and consensus based planning and execution of such projects. The communities are directly involved in our Labs which help us address difficult issues and accelerate solution development. The outcomes of these labs are then fed into the system to bring about large-scale transformation.

DISCONNECTION	1	COMMUNITY DIALOGUE
SILOS	2	MULTI-STAKEHOLDER PLANNING
DETACHED PLANNING	3	RE-CONNECTING WITH THE COMMUNITY
SCATTERED IMPLEMENTATION	4	IMPLEMENTATION FOR BIG, FAST RESULTS
NO MONITORING	5	SOCIAL IMPACT STUDY

TANISHKA FOUNDATION

Tanishka Foundation is an international, woman-to-woman, community based network that is committed to the cause of upholding women's dignity and mainstreaming their role and responsibility in the social and economic transformation of our nation.

Founded on April 11, 2013, the network today has a membership base of almost 110,000 members and is growing in a robust manner. The network has presence in India and Mexico. The broad areas in which the network actively conducts projects are land rights, education, health, water and sanitation, environment, livelihoods, leadership and public participation in governance.

TANISHKA MEXICO

Mexico as a nation faces women's issues which are similar to those of India. Patriarchal society, inequitable opportunities, and lack of mobility on social and economic parameters are issues critical to both countries.

Elisa Salinas set up The Women's Project (TWP) in Mexico

to provide a dignified voice to the women of her nation. After understanding the impact of the Tanishka network in India through assessment of several thousand success stories of social, political and economic empowerment of women in Maharashtra, she realized the need for a similar network in Mexico, and approached DCF to replicate it. The network was launched in Mexico on December 2, 2014.

Between August 24 and 29, 2015, members of the Tanishka Foundation, India, carried out a six-day workshop in Mexico to facilitate a structured, peer-to-peer network which would provide women a platform to resolve societal issues at the grassroots level, and would ultimately empower them to become catalysts of change and achieve socio-economic transformation. This intensive workshop comprised rigorous engagement between various stakeholders, namely, the Tanishka India Team, The Women's Project (TWP) Mexico Team, National Institute of Women in Mexico (INMUJERES), Mujeres Aportando Mujeres (MAM) Team, associated businesses of Grupo Salinas, UN Women, and Local Women Influencers.

YOUNG

Inspire. Network. Deliver.

YOUNG INSPIRATORS NETWORK (YIN)

YIN is a voluntary, holistic platform for youth (ages 18–24) whereby they can achieve personal, professional and societal growth by working on projects and through interactions and events with influencers, mentors and enablers of our society. YIN considers youth as a critical constituent in nation transformation. Projects are encouraged in areas where they will be able to address concerns that affect the world they will inherit.

YIN aims to address matters of youth related to their transition from education into livelihood options, and also to address issues beyond skills, such as attitudes, values, and ethics. YIN members across Maharashtra implemented more than 400 projects during the last year. These projects focused on education, social issues, nation development, health, personality, career and environment.

GLOBAL
INSPIRATORS
NETWORK
Inspire. Network. Deliver.

GLOBAL INSPIRATORS NETWORK (GIN)

The youth of today are the future of our world. Keeping this in mind, DCF launched its youth community network called Young Inspirators Network (YIN), which was a huge success in Maharashtra, India. This motivated us to take it further, and we recently launched the Global Inspirators Network (GIN) in Karlsruhe, Germany.

GIN is a voluntary alliance of young citizens (in the age group of 18 to 35 years) around the world striving for positive change through involvement in responsible, challenging actions. It aims to create a spirited and unified platform that inspires and engages the youth and young working professionals, and offers opportunities for planning and/or decision-making, affecting others in activities whose impacts or consequences extend outside or beyond the youth members themselves. The unique promise of GIN is to integrate young adults as a dynamic force, ensuring direct outcomes through tangible results for the critical process of national building.

GIN focuses on three distinct areas for youth and young working professionals:

- **Personal development**
- **Professional development**
- **Societal development**

OUR METHOD

Interaction of participants of 'Water for All Lab', Mumbai, May 2014

“The lab provides a good forum for ideation and hearing of silos. It gives excellent opportunity for value addition to all participants. It’s a great chance to be a part of history, as this is a “never-before” exercise & fantastic learning process.”

Vidyut Varkhedkar
Deputy Collector, Kolhapur

INTEGRATING DCF LAB INPUTS INTO A STATE TRANSFORMATION PROGRAM: WATER SECTOR

DCF conducted a multi-stakeholder, consensus based planning program titled Water for All by 2019 Lab that spanned a period of six weeks. It had the ambitious objective of making the State of Maharashtra drought-free by 2019. Through extensive research and analysis, combined with multi-disciplinary knowledge and best practices, DCF identified 32 high impact initiatives which would be transformative in nature.

MULTI-STAKEHOLDER CONSENSUS BASED PLANNING PROCESS

IMPACT OF WATER FOR ALL BY 2019 LAB

- 70+ • Participants in the water lab
- 60+ • Organizations including relevant government agencies, NGOs, corporates specializing in water and even international organizations
- 30+ • Syndication meetings held with subject matter experts, including senior government officials, corporates, international organizations and water activists
- 8000+ • Man-years of experience in the water lab
- 240+ • Hours of lab effort logged by the Water Lab team, with more to come
- 200000 • Man-hours of effort logged by the Water Lab team
- 9 • Water source and conservation initiatives
- 10 • Agricultural initiatives
- 13 • Domestic and industry initiatives
- 32 • Government of Maharashtra included 14 of the 32 initiatives identified into their flagship project called the 'Jalyukta Shivar Abhiyan' or 'Water Secure Region'
- Initiatives from Water Lab under PPP worth \$12 Billion were identified
- Government of Maharashtra nominated DCF as 'Evaluation and Monitoring Agency' for Jalyukta Shivar Abhiyan

SAKAL INTERNATIONAL LEARNING CENTER (SILC)

TOP: Sakal International Learning Center, Pune, India
BOTTOM: Abhijit Pawar at SILC Inauguration, Pune, 2013

DCF works closely with the Sakal International Learning Center (SILC) for skill development and capacity building across all stakeholder groups. This includes students, business professionals, government employees, and NGO employees. SILC combines the best global practices in education through collaboration and synergies with research and educational institutions such as universities across the world, and adapts them to the Indian context. The SILC pedagogy, besides focusing on core curriculum, is innovatively designed to give each participant experiential learning on how governments, business and the non-government sector can work harmoniously together. This will help create projects or programs across sectors with complete political, economic and social alignment, and thereby mitigated risk. The key outcomes for participants graduating out of a course at SILC are:

- Participation in projects having a high socio-economic impact
- Interaction with and/or exposure to multiple stakeholders affecting the area/sector of expertise
- Insight and participation in policy formulation
- In-depth applied research aligned with industry as well as emotionally unifying research
- Industry integration into lifecycle of the course, including structure, pedagogy, curriculum, practical training and assessment
- Access to national and international study tours and exchange programs
- Opportunities for international internships

AGROWON

DCF works closely with Agrowon to enhance the life of farmers and agriculturists. Agrowon is recognized as the world's largest 'agriculture daily'. Through Agrowon, farmers and agriculturists get a first hand insight into global best practices, innovation, equipment, and trends for

all things associated with agriculture and agri-business.

Through the Agrowon Foundation, village heads (*Sarpanchas*) meet annually to have a peer review on agricultural practices in their villages and deliberate on topics that would improve and enhance agricultural productivity. Agrowon is

developing a community - driven socio-agro program that will be a showcase for experiments, technology, best practices and innovations which can be adapted to Indian conditions. By enhancing agricultural output, Agrowon facilitates a direct impact on rural livelihoods and thereby, on rural development.

MESSAGE BY ABHIJIT PAWAR, FOUNDER & CHAIRMAN, DCF

‘As nations are trying to bridge the gap that exists between the fortunate and less fortunate in the world at many levels, such as gender, economics, health, education, etc., it has now been fairly accepted that the current systems and policies in governance have serious limitations.

Delivering Change Foundation has the solution to bridge this gap through mobilizing and connecting the grassroots to boardrooms, thereby transforming society in a speedy manner, which is sustainable, scalable and replicable globally.’”
